

## LETTER from the GM

The products showcased in this issue of BRight Times will give you an insight of some of the specialty materials we stock for the benefit of your projects and events. We are here to provide the latest innovative products to allow you to achieve the best results possible for your respective projects. If there is any product related to your line of business that you feel we should carry in our range, please do not hesitate to contact me to discuss this, it might be something we have easy access to but have not stocked because lack of customer feedback with regards to a specialty item.

We have been stocking the Plaskolite mirror range for a few years now and due to the popularity and quality of the product; the range of colors stocked has been increased. The Plaskolite range also includes certain items such as abrasion resistant sheets and polycarbonate mirror which can be sourced on backorder.

Ever placed forex outdoor only to have it warp and curl from the exposure to the sun. The answer to this problem is Forex Smart, which is available in stock.

I hope to hear from you soon.

## PLASKOLITE MIRROR SHEETS

Plaskolite is a leading manufacturer of acrylic sheet; impact modified acrylic sheet, acrylic resin, polystyrene sheet and acrylic mirror sheet. Since 1950, it has built an excellent reputation for providing high quality products and responsive customer service. From its manufacturing facility in Zanesville, Ohio, Plaskolite delivers flawless quality sheets and resin to customers worldwide.

FABBACK acrylic mirror sheet is made with OPTIX continuously processed acrylic sheet. FABBACK has the industry's toughest protective back coating, which protects against scratching during fabrication. Available in clear, textures and in 19 vibrant colors, this durable acrylic mirror is ideal for slat walls; point of purchase displays, casinos, children's toys, cosmetic displays and for applications in the food service industry. Acrylic mirror is only 45% the weight of any standard glass mirror in the same thickness. Colored mirror is an excellent way to make a statement about yourself or your company. These colors can be saw cut to size or laser cut in custom shapes and sizes. All of the colors are continuously manufactured substrate with a non-delaminating guarantee.

"See-Thru", sometimes called two-way mirror, is a semi-transparent film of aluminum deposited on an acrylic or polycarbonate substrate. From the illuminated side, it is a mirror. From the darkened side, it becomes transparent. "See-Thru" has been used successfully in monitoring and surveillance operations in such places as stores, correctional institutions, hospitals, and casinos. "See-Thru" is also used to make infinity lights and multiple image devices. It can be used in advertising and for special theatrical props and effects. "See-Thru" is also available in colors and other substrates on back order.

Plaskolite's "ARmadillo" scratch-resistant coating is available on mirror acrylic, non-mirror acrylic, and polycarbonate; and in many colors and thicknesses. Ideal for applications that require abrasion, stain and solvent resistance, such as, retail displays, table tops, door panels and other applications that are exposed to high traffic. "ARmadillo" can also be written upon with erasable markers, making it useful in scheduling boards and restaurant menu applications. The coating is available on one or two sides. Please call for availability and delivery information on this custom and non-stock item.

Plaskolite offers polycarbonate mirror sheet for better strength, security and flame resistance. Polycarbonate mirror is available in 3mm and 6mm in 1.22m x 2.44m sheet. Plaskolite also offers this in See-Thru, First Surface and ARmadillo scratch-resistant sheet. Call for quotation, availability and delivery information.

Blue Rhine carries stock of Plaskolite acrylic FABBACK Mirror in a standard sheet size of 1.22m x 2.44m x 3mm in colors Amber, Blue, Bronze, Grey/Black, Gold, Green, Pink, Purple, Red, Silver, Teal, and Yellow. Silver mirror is also available in 2mm and 6mm.

## FOREX<sup>®</sup> SMART

With FOREX smart 3A composites launched the first lightweight foam sheet for outdoor advertising. The very lightweight though extremely rigid and stiff all plastic sheet material has a core of expanded polystyrene and surfaces of solid polystyrene. Its extremely white surface guarantees a perfect substrate for direct to substrate digital printing with UV curing inks as well as with solvent based inks. Due to its very good weathering properties FOREX smart can be used for outdoor applications up to two years - even printed. A perfect substrate for the advertising industry and wherever time is crucial: print - cut to size - install - ready. FOREX smart saves you time, is easy to install and shows extremely fresh colours when printed.

In addition FOREX smart is used for screen-printing applications such as event marketing, promotion campaigns and high-quality signage. Forex Smart is available in stock in a standard size of 1.22m x 2.44m and thicknesses of 5mm and 10mm.

- Lightweight
- Fully recyclable
- Very good weathering properties making it suitable for outdoor applications up to 2 years
- Excellent printability
- Moisture resistant
- With 200 kg / m<sup>3</sup> FOREX smart is extremely light, yet very stable and rigid.
