

Accurate Laser E130 CO2 Laser Cutting & Engraving System

The Accurate Laser E130 is a compact and efficient CO2 laser cutting and engraving system designed for precision processing across signage, décor, and customized production applications. Engineered for stable performance and smooth operation, it delivers accurate cutting and engraving on materials like acrylic, MDF, wood, leather, and plastics. Combining speed, reliability, and user-friendly controls, the E130 is ideal for businesses seeking high-quality output with efficient workflow management.

Key Features

High-Precision CO2 Laser

Delivers clean, accurate engraving and smooth cutting performance across materials like acrylic, MDF, wood, leather, and plastics, making it ideal for both detailed artwork and production applications.

Compact Industrial Design

Built with a space-efficient yet durable structure that ensures stable machine performance, reliable workflow operation, and easy integration into production environments.

CCD Camera Positioning

The intelligent CCD camera system enables accurate contour detection and alignment, allowing precise cutting of printed graphics and complex custom-shaped designs.

User-Friendly Control System

Features an intuitive DSP controller with easy job setup, simplified machine operation, and compatibility with commonly used laser software for efficient workflow management.

Efficient Cooling & Ventilation

Integrated cooling and exhaust systems help maintain optimal operating temperatures, improve machine stability, and support longer component lifespan during continuous operation.

Versatile Material Processing

Capable of cutting and engraving a wide range of non-metal materials, making it suitable for diverse production and customization applications.

Use Cases

- Signage & Acrylic Letters
- Customized Gifts & Awards
- Interior Decoration
- Prototype Development
- Woodcraft & Engraving Applications
- Label & Sticker Cutting
